

Featured Product

Altech® **FLEX** Power Supplies upto **150%** Power Boost for **3 Minutes** ... the longest time in the industry

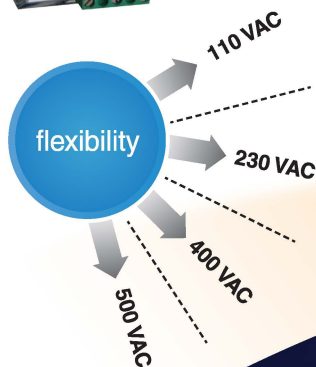

More flexibility in input voltage

The FLEX line of power supplies are suitable to a wide range of input voltage. With a single type it is therefore possible to meet the requirements of more applications and consequently improve design activity and stock management.

More Advantages

- Power Good relay for monitoring the output voltage level
- Applications in compliance with EN 60204-1 standard
- Hiccup Mode Automatic Restart
- Manual Reset Mode Restart by Operator
- Continuous Output mode
- Output circuits protected by magneto-thermic circuit breakers and snap-on DIN rail bracket
- Easy Parallel connection

PSA

FLEX Power Single Phase
24V DC Power Supplies

PSB

FLEX Power Two and Three Phase
24V DC** Power Supplies

**Other output voltages on request.

- Up to 150% Power Boost
- Compact Housing
- Available in 1, 2, and 3-phase
- High efficiency up to 92%
- Three overload / short circuit protection modes
- Over temperature protection
- Built-in DC OK relay contact
- LED indicator for power on
- Easy parallel connection
- Small size
- 3 year warranty
