

Easy on. Easy off. And the first ever.

BradyGrip™ Print-on Hook Material

The first-of-its-kind solution that can transform your telecom, datacom, electrical and construction identification. Quickly ID a bundle of cables or wire, then locate it when you need an update. Brady and VELCRO® Brand have partnered to bring you rolls of this exclusive, print-and-place material that can be easily applied, repositioned or removed. This means there's no costly rework on your end. BradyGrip™ Print-on Hook Material leads the marketplace as a long-awaited, printable solution that can help you get a grip on your wire and cable ID.

Improves efficiency — Maximizes your uptime with faster, printable ID on cable bundles.

Easy on, easy off — Apply, reposition and remove with exclusive, print-and-place material.

Safe — Offers a non-damaging alternative to nylon cable ties.

Ultra-adaptable — Customize labels to fit big or small jobs by printing on different-width material.

These materials work through a number of printer platforms. Check them out:
